- Complete blasting and painting available for a long-life new look
- Stainless steel and modular piping

Key Facility/Equipment

- Cranes - 90 ton outdoor + 35 ton
30 ton indoor

Yard & Storage Area

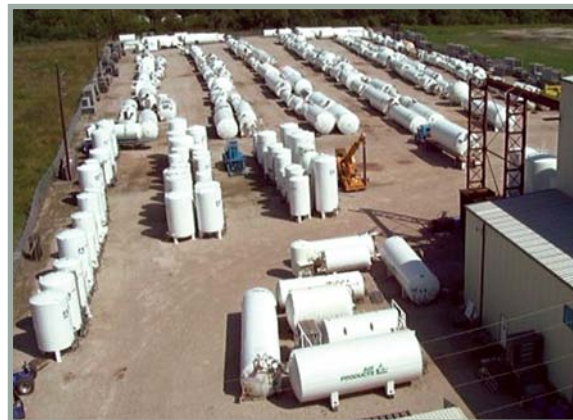

The large stabilized yard storage space accommodates heavy truck and crane traffic.

Warehouse & Clean Room Area

The facility's warehouse and clean room are located adjacent to each other. The strategic placement of the clean room with the warehousing operation allows for the efficient movement of oxygen cleaned parts into and out of the warehouse for use by the production floor.

Blast & Paint Area

Sandblasting and painting areas located on opposite sides of the facility for optimum paint finish.
